

HOPES + FEARS

hopes

That i will have a long period of remission. Be able to go to a camping music festival and not to have to worry about not having toilets facilities for 3 days...to be fine with that. To be able to eat out & to not have to worry about what i'm eating and how it will affect me over the next 12hrs. Be able to have a job that i love & not have colitis stop me from doing it to the best of my abilities. To be able to drink a glass of champagne again without it turning to acid in my tummy!

fears

Feeling like i have to deal with this all on my own & not asking for help when i need it...feeling isolated. Worriying that colitis & the medication i take will mean that i wont be able to have children. Having the worry that being single with a long term illness, will i find someone who will be understanding and accepting of this at times very unpleasant condition. Worriying that all medication avenues have been exhausted and having to face life living with 'a bag'.

next steps...

Having a one page profile so people know how best to support me. Find out age limit for adoption.
