

DREAMS

What are my resources?

MY wife (Jennifer), kids (Chana and Kirk).

Keep doctors informed so they can help me as best they can.

Always research the information given to me to stay informed.

Who do I need to involve?

I need as much education as possible about state of the art treatment alternatives.

Always ask a lot of questions.

What are my next steps?

ALWAYS sharing my tools with my docs and children.
Updating the tools - this helps me and my wife to talk openly about my thoughts.

For KIRK:
To be pain free! My vision is stable and even improves!
NO more surgeries!!
Traveling with my wife- enjoying life. To be a "papa" someday.

What are your hopes and dreams?

Taking care of myself so that I experience less pain.
Taking care of my eyes- protecting the vision I have now.
Planning ahead & around doctor appointments so we can travel.
Prepare for bad days.

I keep my concerns about health, hopes and fears to myself too often.
Celebrate good days!
I need to stay involved & open about my thoughts to those who care about me & to those who cares for me.

Where do my dreams make sense?

What have I learned?
